

JBM

The Risk

Professor Barry Clarke
Vice President ICE and
Chairman Further Learning Committee

Why?

Why now?

How?

Groups A and B
Health and Safety Risk Management

Groups C and D
Sustainability

Group E
Ethics

Groups A and |B Health and Safety Risk Management

- What is meant by a culture of health and safety?
- What attributes is a graduate expected to have so that they can demonstrate knowledge of health and safety and understanding of that knowledge through application?
- What evidence should be provided to demonstrate that a graduate has an understanding of the concepts of health and safety?
- What are the barriers to developing that culture?

Groups C and D Sustainability

- What is meant by a culture of sustainability?
- What attributes is a graduate expected to have so that they can demonstrate knowledge of sustainability and understanding of that knowledge through application?
- What evidence should be provided to demonstrate that a graduate has an understanding of the concepts of sustainability?
 - What are the barriers to developing that culture?

Groups E Ethics

- Why should academics take responsibility for ensuring that graduates develop a culture of health and safety and sustainability?
- What are the barriers stopping academics taking that responsibility?
- What actions can be taken to ensure that all academics engage in developing this culture?

Timetable

14.20 – 15.30 Breakout sessions

 Appoint a recorder and raconteur

15.30 – 15.45 Tea break

15.45 – 16.15 Feedback from groups and discussion

 Highlight three key points for discussion
