Educational Requirements for an Engineering Technician

Higher National Certificate (HNC), Higher National Diploma (HND), Foundation Degrees, National Certificate and National Diploma Courses

The courses listed have been approved against standards set by the Institutions of Civil and Structural Engineers, the Chartered Institution of Highways & Transportation and the Institute of Highway Engineers and endorsed by the Engineering Council.

Please note that from Autumn 2004 institutions were no longer required by the Engineering Council to accredit individual college HNC/D programmes. The JBM institutions have approved the HNC/D programmes awarded by Pearson (BTEC), formerly Edexcel, and SQA and for this reason the formal accreditation periods are being allowed to lapse and may not have been extended after this date but the courses continue to be recognized. From 2011, Foundation Degrees in Civil Engineering have been accredited by the member institutions of the JBM.

All the courses listed below will meet the educational requirements for an Engineering Technician. A Higher National from the IEng listing will meet the educational requirements for an Engineering Technician.

The HND and Foundation Degree courses in Civil Engineering would need to be topped up with a period of Further Learning after graduation, in order to meet the academic requirements for Incorporated Engineer status (although some courses before 1999 may fully meet the academic requirements for IEng). Holders of HNC would require a longer period of Further Learning. This further learning can be achieved in a combination of ways – full or part-time in HE, distance learning or work-based learning.

Graduates from the HNC/D or Foundation Degree courses in Construction, Construction Management, Sustainable Construction etc. will be required to apply to one of the JBM member institutions for an academic assessment of their qualifications in order that they can be advised of the additional study that will be required to meet the academic base for IEng registration. These graduates will meet the educational requirements for an Engineering Technician.

Historical data on all accreditation activities is held at the ICE, IStructE, CIHT and IHE and you should contact the Institutions directly if you have any queries on courses pre-1999.

Mode of Course

FT = Full Time

PT = Part Time

DL = Distance Learning

List of Technician Courses		
Abbreviations – BTEC (Business and Technology Education Council) HNC (Higher National Certificate) HND (Higher National Diploma) Mode of Study – FT (Full Time) PT (Part Time) SW (Sandwich)
