

**May 2020**

### **Chartered Engineer Courses (Partial)**

The degrees in this listing have been accredited against standards set by the Institutions of Civil, Structural and Highways & Transportation Engineers, the Institute of Highway Engineers and endorsed by the Engineering Council.

Graduates from these programmes will:

1. Fully satisfy the educational base for an Incorporated Engineer (IEng).
2. Partially satisfy the educational base for a Chartered Engineer (CEng). (A programme of accredited Further Learning (i.e. MSc) will be required to complete the educational base for CEng).
3. For further information and details of Further Learning programmes for CEng. Please refer to other documentation available on the JBM website [www.jbm.org.uk](http://www.jbm.org.uk)

Courses marked with an asterisk (\*) will need to be topped up with a period of Further Learning after graduation, in order to meet the academic requirements for Chartered Engineer status. This further learning can be achieved in a combination of ways – full or part-time in Higher Education, distance learning or work-based learning. The intake years from which graduates will be required to complete Further Learning is shown in the table.

#### Mode of Course

DL = Distance Learning

FT = Full Time

PT = Part Time

S = Sandwich

Courses are accredited for a given intake period normally on a five-yearly cycle although this may vary (see below). The years shown in the listings are the inclusive intake periods for which these courses are accredited.

Degrees are only accredited at Third Class Honours and above.

Please note that in some cases, accreditation beyond 2012 might be pending. Please contact the JBM Secretariat at [jbm@ice.org.uk](mailto:jbm@ice.org.uk) for further information.<sup>1 2</sup>

---

<sup>1</sup> Where an intake year has not been extended, this will usually be because the University no longer offers civil engineering courses, for example the entry for the University of Hertfordshire.
