

Chartered Engineer Courses

MEng Accredited CEng (Full)

The MEng degrees listed in this booklet have been accredited against standards set by the Institutions of Civil, Structural and Highways & Transportation Engineers, the Institute of Highway Engineers and endorsed by the Engineering Council.

Graduates from an accredited MEng degree will fully satisfy the educational base for a Chartered Engineer (CEng).

Mode of Course

DL = Distance Learning

FT = Full Time

PT = Part Time

S = Sandwich

Courses are accredited for a given intake period normally on a five-yearly cycle although this may vary (see below). The years shown in the listings are the inclusive intake periods for which these courses are accredited.

Please note that in some cases, accreditation beyond 2011 might be pending. Please contact the JBM Secretariat at jbm@ice.org.uk for further information. ^{1 2}

Graduates with an accredited MEng degree will also fully satisfy the educational base for an Incorporated Engineer (IEng).

¹ Where an intake year has not been extended, this will usually be because the University no longer offers civil engineering courses, for example the entry for Queen Mary and Westfield.

² Accreditation periods since 1999 are shown in bold type. Historical data on all accreditation activities is held at the ICE, IStructE, IHE and CHIT and you should contact the Institutions directly if you have any queries.
